

SEEDS TRUST

vegetable, herb, wild flower, native grass seeds
for a sustainable future

2010 Seeds Trust Pricelist

THE COMPANY

Seeds Trust is a 25 year-old family corporation dedicated to delicious home gardens, stunning native landscapes and saving seeds. We search the world's remaining seeds to find important, adapted, open-pollinated varieties. We then teach our customers to save their own seeds from individual plants doing best in their own gardens.

By finding and growing varieties from around the world, we act as a resource for thousands of gardeners looking for diversity and reliability. Our varieties of vegetables and wildflowers have proven vigorous, early-maturing, tolerant of a harsh climate, and also exceptionally tasty in fruit and beautiful in bloom.

THE MISSION

Our mission as a bio-regional seed company is to search the world to find seeds from the best varieties adapted to cold, short seasons. Our seeds were tested in our gardens in central Idaho at 6,000 ft. for more than 20 years. Now we test at our new trials gardens in the high desert region of Northern Arizona. The most successful are made available to you.

- We are dedicated to the philosophy of sustainable agriculture.
- We are dedicated to supplying the highest quality seed available.
- All of our seeds are untreated and suitable for certified organic gardens and farms.
- All seeds we grow ourselves are certified naturally grown.
- We sell non-hybrid (open-pollinated) varieties. Seeds from non-hybrid varieties will reproduce faithfully as opposed to seeds from F1 hybrids which produce sterile or complicated seed.
- We encourage and teach seed saving.
- We collect our wildflower seeds in an environmentally sensitive and sustainable manner.
- We have taken the safe seed pledge. We do not buy, sell or use genetically modified seeds.
- Every item we sell comes with our guarantee. Please contact us if you have any problems.
